

Position vs Time

avg

values

$$X_0 = 0.012$$

$$V_0 = 0.262$$

$$Q = 9.938$$

7a) the data coincides fairly well w/ our fit. Our data is consistently under the fit, which is exactly as our prop was not completely even.

b) the reported avg. acc.

was 99.99%

close to  $g$ , certainly within  
tolerance for an experiment of  
this type.
